## Casual Furniture Collection

## WROUGHT IRON

Specially developed for the harshest outdoor elements, providing an exceptional corrosion barrier that reliably seals and protects the high quality steel frame, even in coastal areas.

### ELECTROTHERM® ADVANTAGE

- Uniform coating thickness with excellent edge coverage
- Higher powder adhesion rate (20% more than standard methods)
- Maximum weather and corrosion resistance
- Superior color retention and resistant to blistering and peeling

## ALUMINUM

Light weight, sturdiness, flexibility... just a few advantages of this versatile metal that makes it second to none. Elegant aluminum frames combined with our slings or solid polymer resin allow for a contemporary design and timeless character. The specialized surface treatment and powder coat finish not only develops the frames signature brilliance, but allows for an easy maintenance and extreme resistance to weather conditions.

## ALL WEATHER WICKER

Our high quality P.E. material is all-weather, maintenance free and can be used indoors or out. This synthetic weave uses hand-made manufacturing techniques offering optimal strength and durability on all-aluminum powder-coated frames. A UV rating of 2000 hours provides a high level of color fastness combined with all-weather Sunbrella® fabrics to withstand even the harshest elements.

## INFINITREE TABLETOPS

Infinittree tabletops are maintenance-free 100% engineered plastic that will retain its beautiful wood appearance. Best of all, it is made with recycled material on an all-aluminum powder-coated frame.

## SOLID POLYMER RESIN

The material recipe for this high-quality polymer has been specially developed by KETTLER® and is impervious to all weather conditions. All the solid polymer elements are extremely sturdy with brilliant surfaces and no sharp edges. Here too, lies the fine distinction between KETTLER® products and mass-produced articles.

## KETTALUX® / KETTALUX®-PLUS

This high-quality polymer material is mainly for seat, back and arm-rest elements as well as the table tops. The proprietary material is produced in a two-component process. The outer layer consists of high-quality polymer which forms a hard outer shell. The interior uses sturdy recycled polymer material. KETTALUX® furniture is extremely weatherproof, strong and easy to clean and maintain. Certain collections and tabletops with the KETTALUX®-PLUS symbol are protected with a special thermal treated lacquer. Robotically applied, this premium surface treatment provides added brilliance and non-staining, self-cleaning characteristics.

# KETTALUX®-PLUS TABLES

Thermal treated lacquer coating creates protective self cleaning barrier

High density resin exterior with chip resistant edges

Warp-proof expanded resin core ensures advanced stability and resilience

Constructed in Germany using the KETTALUX®-Plus 2 component process, this innovative tabletop is shock absorbent and totally weatherproof. Its warp-proof resin core and chip resistant edges are made from our proprietary polymer resin, ensuring a lifetime of advanced stability and resilience.

Finished with a thermal treated protective coating, Loft tabletops exhibit self-cleaning properties that help prevent staining and weathering. Similar to the lotus effect, this revolutionary sealer forms a barrier to which dirt particles are unable to adhere.

- Solid one piece top construction is warp proof with chip resistant edges
- Thermal treated lacquer coating provides added brilliance and non-staining characteristics
- UV inhibitors are permeated throughout the top to prevent fading and discoloring
- Totally weather proof with self-cleaning properties
