FEATURES

TELESCOPING MAST

DOUBLE REINFORCED JOINTS

EXTRUDED ALUMINUM MAST

- As the telescoping Nova cranks down, the top portion of the mast rises, allowing you to completely close the umbrella without having to move any furniture placed underneath.
- 4" diameter aluminum center pole with four internal strength channels, combined with the extruded aluminum ribs provide exceptional support and strength.
- For easier installation of an umbrella this large, the Nova mounts to a hinged spigot. This allows for the umbrella mast to be placed onto the spigot while the unit is on its side, prior to raising it to an upright position.
- Reinforced grommets paired with an ultra-durable woven nylon wrap prevent the chance of fabric tearing from the frame.
- Engineered to withstand 50-60 MPH sustained winds.
- Stainless steel hardware throughout.
- Multiple mounting options are available, either permanent or semi-permanent, for installation on any surface.
